

Fusion

At a glance...

Launched in March 2010, the Fusion is the latest model from our World leading partner, Magner International. The Fusion is a value counter with high level forgery detection and combines speed, reliability and simplicity of use in a robust, compact unit. This model is Swiss engineered and can handle multiple currencies "out of the box". It is already programmed with all Scottish notes and newly issued notes can be added into the machine's memory in a matter of weeks.

Product features...

- > Instant counterfeit detection with full line IR image pattern recognition
- > Full denomination breakdown on external LCD display
- > Self cleaning dust accumulation sensors
- > One touch hot key to switch between piece count and value count

Easy navigation
