CounterCache™

At a glance...

Security has always been important in the design of the CounterCache range. Often imitated, these robust POS security products continue to hold their position as the retailer's first choice products for cash protection. There are over 1/2 a million CounterCache units protecting an average of 1 billion dollars in global retail every day

Protecting over a billion dollars every day

Perfect note presentation

Secure locking system

Anti-fish mechanism

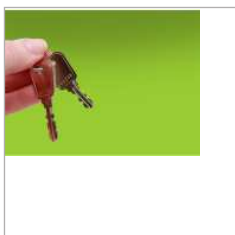

CounterCache™

Product features...

- > increases POS security, removing the cash removes temptation of till snatches & internal shrink
- > CounterCache removes the need to perform time consuming till skims
- > streamline cash processes with the use of the inner transportation cassette & security seals
- > integrated note restrictor prevents 'fishing' from the unit, once a note has been inserted it can only be removed with a key
- > dual key access adds to the robust metal construction for secure storage at the POS
- > an integrated vertical note stacker makes for a simple operation and provides excellent note presentation

Available Accessories

Flat or radial lock

Tamper evident pouch

CounterCache cassette

- > Pouch Carrier and TruPouch™ on Pouch model
- > Inner Cassette and Keyplate on cassette models
- > 1 year warranty as standard

You can further enhance the security of your cash processes with a range of CounterCache accessories from Volumatic. Security seals, either plain or numbered provide added security and an audit trail for cash that is transported by cassette from POS to the cash office. Spare cassettes reduce downtime during shift changes or cash lifts. Shift change cards provide operator accountability and cash trolleys provide secure transportation for multiple cassettes from shop floor to the cash office.

CounterCache intelligent™

At a glance...

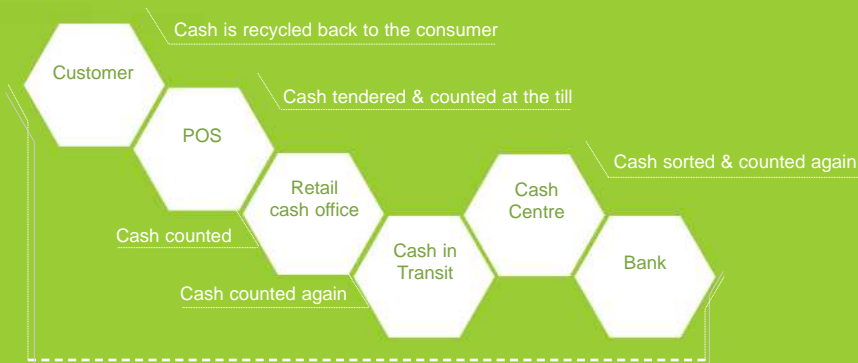

The CCI brings note validation, data capture and secure storage to the front line at the point of sale, allowing your cash to be processed more quickly, less expensively and more securely. Once a banknote has been deposited into the CCI, the cash does not need to be touched again until it reaches your cash centre or bank.

Product features...

- > increases POS security, removing the cash removes temptation of till snatches & internal shrink
- > CounterCache intelligent removes the need to perform time consuming till skims
- > streamline cash processes with an end to end, one touch solution

Closing the cash loop...

With CCi from the POS to the bank cash does not need to be manually counted

In an ideal world, once cash has been handed over from the customer to the retailer, 100% of this money should find its way quickly and directly into the retailer's bank account. Unfortunately, this is not always the case. Volumatic's CCi is a unique cash validation and storage device that can help protect and secure cash at all stages of its journey from the consumer to cashier, to back office, to cash-in-transit company, and finally to the cash centre and bank.

Specification...

- > Four way note acceptance giving speed of operation and customer flow, notes are instantly validated using 40 point optical validation technology
- > Notes are instantly counted providing a time-stamped data log, 8,000 transactions and operator events are automatically recorded giving full accountability and a complete audit trail
- > CCi is completely configurable allowing it to be integrated easily into any retail cash flow process. Supplied with ethernet, bluetooth, USB or RS232 serial link it can also be linked in to POS and store network

TruPouch...

- > TruPouch is a fully recyclable sealed and labeled, tamper evident carrier that will secure cash until safely inside the cash centre
- > TruPouch will secure up to 400 perfectly presented notes
- > Dye penetration and i-box approved for transport in CiT carriers
