

To whom it may concern

If we look at the market situation in Western Europe, here in France, the “Counter Cash Intelligent” and its associated software solution “Cash View” is the answer for the retail world today.

Today, the retail market suffers from being hit by both a difficult economic situation combined with a serious increase of criminal acts....and until now, no solutions have overcome this situation.

The CCI solution brings for the first time immediate savings and a fast return on investment while securing the cash. It stops forgeries, counting errors and costly investigations, give confidence and lower the risk. It’s amazing how this simple solution and can provide so much saving.

It is a true front office revolution showing people how to shorten to its maximum cash handling in stores.
